

CL264 Cobra cleat

The CL264 is an alloy cleat designed for tensioning Kitesurf brake lines. We have combined our expertise and experience with that of top Kitesurfers, to produce a cleat that outperforms all other devices on the market.

Features:

- Allows micro adjustment of your brake line, both in and out.
- Designed from scratch to meet the special needs of Kitesurfing.
- Easy to attach with simple larkshead knots. Performs best with 6mm, 1/4" ropes.
- Tests show that the CL264 lasts much longer than standard cleats.
- Available in Silver or Hard Anodised finishes.

Packaging. CL264/L (silver) & CL264AN/L (hard anodised): Box of 25 cleats.
 CL264/R & CL264AN/R: One cleat per retail card. 10 cards per box.
