Material Selection

Nylon cleats offer very good value for money and are ideal where high loads or rope surges are not likely to be encountered.

Aluminium cleats are unaffected by the heat generated by a rope surging back through a cleat. Suitable for sub-zero temperatures. Good corrosion resistance.

The **Hard Anodised (AN)** finish gives a high-tech and fashionable appearance as well as offering superior resistance to sea water corrosion.

Can be fixed with standard screws and rivets, on tubular or flat surfaces.
