

The only secure fastener without protruding parts

safe and secure

[WWW.PERFIX.NL](http://WWW.PERFIX.NL)

# PERFIX is safe, secure and elegant:

PERFIX is a secured connection without using any protruding parts. These two features combined make this system unique and form a solution for many different applications. PERFIX is developed for fastening marine covers and sprayhoods on boats, but found its way to many different other situations where safety, comfort and elegance are required to fix any textile.

## Colours and combinations

The PERFIX system consists of buttons and receivers. For the receiver-part there is a version for fixed surface (using screws etc.) and one for cloth. PERFIX-parts are sold separately and are available in different colours. In this way, several combinations make it able to match deck and cover colour. Special colours on request

### Button

#### Blister DIY-Kit 5 pack

Do It Yourself KIT for easy installation or even replacement

9100-5 DIY-KIT 5 pack

## NO PINS on deck

PERFIX does not involve protruding pins, sharp parts or other hazardous obstacles on deck. PERFIX has smooth, round fixing points which prevent injury, cloth damage or snagged ropes and cords.

## Perfect fixing grip

A special grip design means that you can easily attach PERFIX to the receivers. Even with cold and wet fingers, the marine covers can be easily released from the PERFIX receivers.

## Durable an corrosion free

Each individual part of PERFIX is made of the highest quality plastic and the spring is made of the best 316 stainless steel, so PERFIX doesn't contain fragile parts.

## Easy switch-over to PERFIX

PERFIX can easily replace most other fasteners using the existing holes on both deck and cover. With the handy key provided,

## Time saving tools

For the installation of PERFIX several tools are developed in close consultation with customers

product	code	package
